OF THE

UNITED VERDE CONSOLIDATED COPPER CO.

Next Wednesday morning at 8 o'clock the books of this company will be opened to the public to receive subscriptions for its treasury stock at 75c per share.

This company is capitalized at 1,500,000 shares with a par value of \$5.00 per share. 1,000,000 shares of this capitalization is in the treasury; 500,000 shares are pooled stock. The pooled stock includes all stock issued for property and for preorganization sales.

Only 200,000 shares of stock will be offered from the treasury at the price of 75c per share. We have every reason to believe that this stock will be oversubscribed several times before the books are opened next Wednesday morning. Already allotments have been made which will total 95,000 shares. Wire orders are on hand from brokers in every part of the country, asking for allotments, which, if granted, would amount to several times the amount of this treasury offering. With but few exceptions, this stock is going to be sold direct to the public.

You will find this stock a profitable buy at 75c per share. It will be listed on the New York and Boston curb shortly, and, we believe, this stock will be selling at \$2.00 or better within sixty days.

This company holds a deed to 22 claims (440 acres) at Copper Canyon, known as the Mahurin property. It also has the U. V. Junior property, taken over from S. S. Ballard, right in the heart of the Jerome district. Both properties will be thoroughly prospected with Diamond drills immediately. The ground has already been examined by experts from some of the most reliable diamond drill concerns in this country.
